FARM STOCK TRACTOR RULES

- 3000 RPM max
- Speed limit monitored with sled operated track side display board
- Stock core injection pump
- No cut or altered tires
- Turbocharger allowed in all classes except 6000 lb. Special
- 20" maximum drawbar height

GENERAL RULES AND INFORMATION

- All pulling vehicles will be weighed, inspected, and drawbars measured.
- 0% weight tolerance. Must be at or below specified weight.
- A digital photo tach will be available for pullers to use before the pull begins. After the pull starts, the photo tach will not be available for use.
- The winning contestant in Farm Stock and Altered Farm will have high idle RPM checked immediately following the class at the end of the track. One tech official will operate the hand throttle and assure injection pump throttle lever is against high idle stop, one tech official will operate the photo tach. 50 RPM tolerance. Any contestant over 3050 RPM will be disqualified.
- Lost weights, parts, or excessive fluids on track will result in disqualification.
- Out of bounds (chalk line and beyond) will result in disqualification.
